newsweekly for pharmacy

Flourishing industry... birds-eye view

Piperita

In the rich fertile acres of Ransom's farmlands, scores of medicinal and essential-oil bearing plants thrive to perfection under the devoted skill of specialist scientists. Processed and assayed with the same meticulous care in Ransom's laboratories, these plants yield superb products that fill the galenical warehouses of the world. Ransoms can also process your own materials, to conserve your capital and reduce your overheads — all in the strictest confidence. Ransoms is an entirely self-contained business, unconnected with any other firm in the industry.

for catarrh and sore throats

NATIONAL NEWSPAPERS

Strong advertising
campaign starts October.

Meggezones returns to
strong advertising promotion
in newspapers this month. The Daily Express,
Daily Mirror, People, Sunday Mirror and
regional newspapers will be carrying strong
advertisements for Meggezones – the strong
one for catarrh, sore throat and cough relief.

You can back this up by displaying and
recommending the strong one too.

People always have to pay for excess weight

... but how many realise the price? Obesity has hidden dangers. It can lead to high blood pressure, bronchitis, angina and anxiety. It can also worsen many other degenerative disorders.

Dieting alone won't always help. And the stimulant amphetamines are contra-indicated by the recommendations of a BMA Working Party.

So what will help? The answer is Ponderax, a glycoliptic agent which has none of the dangers of stimulant addiction. It does not excite mechanisms involved in the central nervous system. And it helps in the treatment of the hidden dangers of obesity.

More than 150 published papers confirm the glycoliptic (fat mobilis-

ing) action of Ponderax and its proven weight-reducing properties (up to 3.6 lb. a week). There's another big advantage, too. Diagnosis with Ponderax skinfold calipers is more effective than by weighing machine. A new spring-loaded version is now available—more accurate and invaluable as a guide to dosage.

*** Important note:** In view of the growing concern over the misuse of drugs it is important to note that after eight years of widespread international use no case of dependence of any kind has occurred with Ponderax.

Three struck off by Statutory Committee

The Statutory Committee of the Pharmaceutical Society directed that the names of three pharmacists be removed from the Register when it met in London this week.

In the case of John Gerard Foy, Chessington, Surrey, the Committee had received a complaint from the Society's Council from which it appeared that a Schedule 4 poison had been supplied without prescription and that a person had become dependent upon the preparation as a result of these supplies.

The allegation against Mr William Albert Gittoes, Basingstoke, Hants, was that he had unjustifiably substituted unordered drugs for those prescribed, without authority and without warning the patient or endorsing the prescription, or that he had been negligent in dispensing in a manner that had, or could have, endangered the health of the public.

John McGregor Wilson, Basildon, Essex, was also removed from the register. The committee were informed that he had pleaded guilty to and was convicted of three offences concerning the possession and illegal sale of Durophet capsules.

A pharmacist was admonished by the Committee as a result of allegations that an advertising feature in a local newspaper amounted to advertising of his company's dispensing services and included direct and implied claims of superiority.

Among points to which the Council objected were the description "chemist" appearing in supporting advertising by other companies, headlines such as "Special feature on the chemists with a difference" and certain wording in the text.

For the pharmacist, it was said that he had seen the proofs of the article, but not of the advertisements nor of the headlines. Some changes he requested were not made.

Giving the Committee's decision, the chairman said the case illustrated that "if you choose to walk on thin ice you may fall in." The Committee was satisfied that the article as a whole went beyond what was permissible and constituted misconduct.

PATA asks for reports on price cutting

Most retailers who price-cut on medicines have complied with the decision of the Restrictive Practices Court when approached by the Proprietary Articles Trade Association or manufacturers, and no case has come to court since the decision.

However, the PATA believes it is not dealing with as many cases as it should be, the Association's council was told earlier this month. It is hoped the situation will be remedied by the appointment of local PATA secretaries in each NPU branch area. The Association will also receive direct reports from pharmacists of alleged breaches of the court's decision.

The council approved amendments to the rules whereby the affairs of the Association will be governed by a Council consisting of six representatives from each of the three sections of the industry (the present council consists of 12 members from each section).

All present members of council will retire as from December 31, 1970 and from that date the executive committee will not be reappointed.

Election of the new council will take place before December 31 and thereafter two members from each section will retire annually.

In presenting the annual report the president, Mr A. G. Garrett, said that the decision to take the rpm case to final hearing, had now been fully justified. But he reminded members that their part of the case was a joint effort with the PAGB. He felt sure that no two associations had ever worked together so amicably and with so much understanding of each others' problems. The bonds between the two associations had thus been strengthened.

The council had also placed on record its appreciation of all

Mr D. Fearnley (centre) receives a memento of the Merck Sharp & Dohme award after presenting his paper to hospital pharmacists (see story below). Making the presentation is Mr C. D. Buzza, a director of the company. Mr W. G. Smith, president, Guild of Public Pharmacists, is on the right

the help which it received from the NPU and all sections of the industry.

The treasurer (Mr T. Marns) in presenting the financial statement said that the excess of expenditure over income for the year of £950 was not due in any way to the expense of preparing the case. It was therefore essential that subscriptions should be increased during 1971 if the PATA was to fulfil its function properly.

Hospital students scheme

The Guild of Public Pharmacists, which recently took over responsibility for operating a national scheme for placing pre-registration students in hospitals have announced that details, including lists of hospitals where training can be undertaken, and application forms, should be in the hands of heads of schools of pharmacy during the week beginning October 26.

Students are advised to ask their school for forms. Any further details may be obtained from the General Secretary, Guild of Public Pharmacists, 150 Southampton Row, London WC1.

Problems for UK pharmacy

Pharmacy suppliers in the UK face two basic problems, according to Mr M. Montgomery, managing director, S. Maw Son & Sons Ltd. They are, he said, the political problem involved in the progressive and inevitable amalgamation of the two trading blocs (EFTA and EEC) and the problem of transforming pharmacy wholesalers into marketing-orientated companies, profitably directed to-

Pharmacy and O & M

Considering the way the pharmaceutical profession may develop in the future, particularly in the light of the Noel Hall report, led to the conclusion that pharmacists may need to draw on a wider range of management services than just organisation and method study (O & M) according to Mr David Fearnley, MPS.

Mr Fearnley, winner of this year's Merck Sharp & Dohme Award for the Advancement of Hospital Pharmacy, delivering a paper in London last week on the results of his survey into the effect of O & M study on hospital pharmacy, said that pharmacists must familiarise themselves with those techniques.

Mr W. G. Smith, president of the Guild of Public Pharmacists announced that the winner of the award for 1971 is Mr T. H. Furber, group pharmacist, South Birmingham HMC at Selly Oak Hospital, Birmingham, B29 6JD, who will carry out his work for the award in connection with "Analytical Control of Drugs in British Hospitals."

wards international markets.

Mr Montgomery, who was speaking at a European Drug Sundries Association meeting in Stuttgart recently, also proposed that the next meeting of the Association, which will be held in the UK in 1971, be based on a discussion of major issues with, perhaps, an exhibition to cope with the physical presentation of new products, packages and visual aids.

Potency of steroids a 'gimmick'

Relative potencies of new topical corticosteroids are just a gimmick—what matters is the maximal effect upon the skin, the British Medical Association's annual clinical meeting in Bath was told last week.

Professor Sam Shuster, University of Newcastle-upon-Tyne, said that the pharmaceutical industry should be addressing itself to dissociating the total potency of the steroid ("the battle of the milligram") from the production of collagen rot—an effect of corticosteroids that leads to skin atrophy and the appearance of striae.

The speaker maintained that corticosteroids had been over-used, particularly in general practice, and this would bring problems in the future.

Earlier in his paper, part of a symposium on drugs and the individual, Professor Shuster stressed the role of the placebo effect in dermatology and made a strong plea for pharmacologists to "produce some sense" out of the effect. At present, the best placebo doctors were the "phoneys," because they "dispense with such certainty." All doctors should develop this ability.

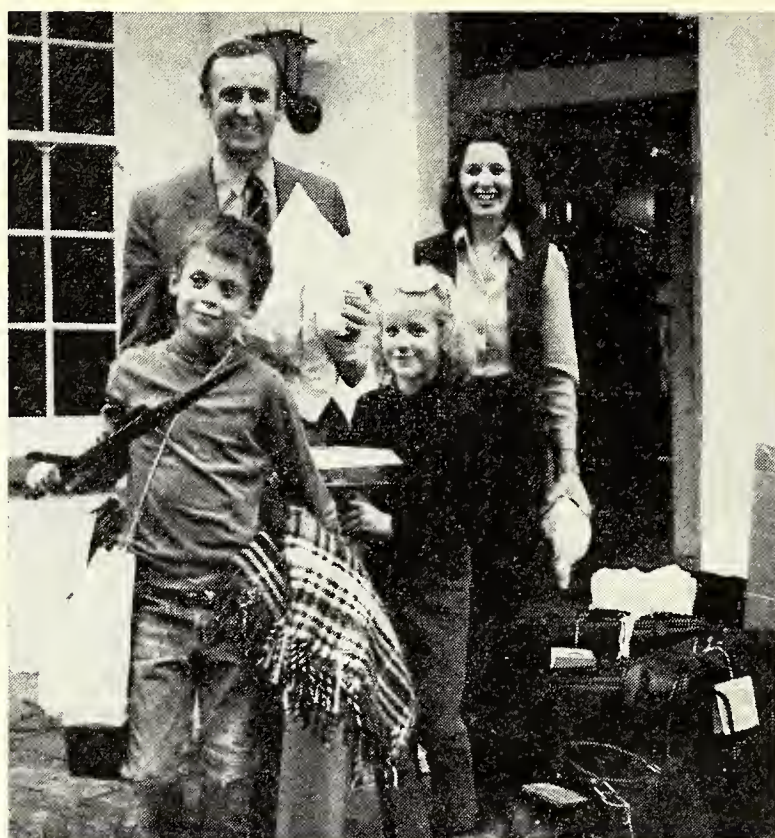

Professor O. L. Wade, Queen's University, Belfast, told the symposium that the introduction of potent drugs had brought about "an epidemic" of adverse reactions, but their importance to the individual was not known. There was a need to develop tools for monitoring reactions—the speaker made a special plea for reports to be sent to the Committee on Safety of Drugs.

"The more I see of adverse reactions, the more convinced I become that no chemical should be given to human beings unless there is a good reason, and that as few drugs as possible should be given at the same time."

Glass container prices go up

United Glass Ltd are to put up the prices of all glass containers by 5 per cent on November 2.

The announcement follows agreement between glass container manufacturers and trade unions for an increase of about 16 per cent in basic wages. In

Former England cricket captain Ted Dexter left Britain on Monday to pilot himself, his wife Sue and their two children in his six-seater Piper Aztek plane to Australia. He has taken several cricket bats in the plane with him to be signed by both teams in Australia and brought back for his several sponsors, among which are Chesebrough-Pond's Q-Tips cotton swabs. Mr Dexter will be reporting the England-Australia 1971 test series for a Sunday newspaper

Benefits expected from new Census

How do gross profit margins compare between the various retail pharmacies in any large town, and how does the turnover per employee or per square foot compare?

These and many other questions about retail trade in general should be answered by the 1971 Retail Census conducted by the Business Statistics Office (BSO), according to Mr Michael Noble, who until last Friday was president of the Board of Trade.

Mr Noble, who was visiting BSO's new offices in course of erection at Newport, Mon, said that it was 10 years since the previous retail Census and he expected that from the new Census would emerge a full pic-

ture of Britain's retail industry. Its findings would be important not only to government but to retailers themselves whose representatives had helped BSO devise the questions to be asked.

"They can use the results to discover how their business compares with the average for similar firms in their part of the country in a wide variety of ways. Manufacturers and wholesalers will also welcome the results," he said.

The 10,000 largest shopkeepers will be receiving notice of the questions at the end of this month, together with *The 1971 Retail Census and You*, a booklet which outlines the uses retailers can make of the results. The questionnaires they will have to complete will be sent to all retailers on January 1, 1972. BSO aim to publish the provisional results of the Census by the end of 1972.

Mr Noble also announced that BSO has ordered an £800,000 computer, to be installed in Newport in May next year. "No other government statistical office in Europe", he

said, "has such a powerful computer. One of its first tasks will be to process the results of the Census".

The President also referred to the new system of industrial inquiries BSO is introducing—annual censuses backed by quarterly inquiries into sales of manufacturing firms.

Out-of-town shopping

Retailers and manufacturers will have an opportunity to see and hear about the out-of-town shopping developments of two French organisations—Carrefour and Parly 2, at a seminar to be held at the London Hilton Hotel on November 19.

A 30-minute film to be screened shows Carrefour's 155,000 sq ft "hypermarket" at Montesson, near Paris, and Parly 2's covered shopping centre which incorporates 100 shops at Le Chesney, near Versailles.

Further details of the seminar from MPC & Associates, 6 Shaw Street, Worcester.

In appreciation

A special general meeting of the Society of Cosmetic Chemists of Great Britain on November 5 will receive a proposal that Mr G. A. C. Pitt be elected an honorary member "in recognition of the almost continuous services which he has rendered to the Society as president, honorary treasurer and member of council since 1957."

Ulster report

Chemicals for fireworks

With the approach of the fireworks season Pharmaceutical Society of Northern Ireland draws the attention of pharmacists to the probability that the complete ban by the Ministry of Home Affairs on the sale of fireworks will more than ever create demand from young persons for chemical substances to make home-made fireworks.

The substances include sodium chlorate, nitrates, magnesium, potassium permanganate, sulphur, powdered aluminium, phosphorus.

If any request for those substances or other oxidising or reducing agents is received from young persons, reasonable steps should be taken to ensure that they are used for a proper purpose.

COMPANY NEWS

Bush Boake Allen's new facilities

Bush Boake Allen (division of Albright & Wilson Ltd) have started work on a £1.8m laboratory and office complex on the existing site at Walthamstow, London, which at present houses the perfumery part of their business.

The new buildings will bring together for the first time all the division's research, laboratory and analytical capabilities in the United Kingdom, as well as providing centralised accommodation for administrative, sales and marketing functions.

To increase production facilities of the site, Bush Boake Allen have purchased the freehold premises of W. B. Bawn & Co Ltd, which consists of approximately 48,000 sq ft of factory and office accommodation.

The buildings are laid out to form three sides of a quadrangle, the fourth side being the existing perfumery laboratory, itself only completed in 1968. The whole new complex is set to the north and west sides of the site, with production facilities on the south and east sides.

It is served by its own new entrance and driveway from Blackhorse Lane.

Metal Box deal

Unilever Ltd are to sell to the Metal Box Co Ltd the Unilever businesses known as Holpak Ltd and King Packaging Ltd with effect from November 2.

Holpak and King Packaging operate three factories in the UK at Bromborough, near Liverpool, Glemsford, Suffolk and Portadown in Northern Ireland. For the present they will both trade under their own names, but will later be integrated into the Metal Box Co's plastics group.

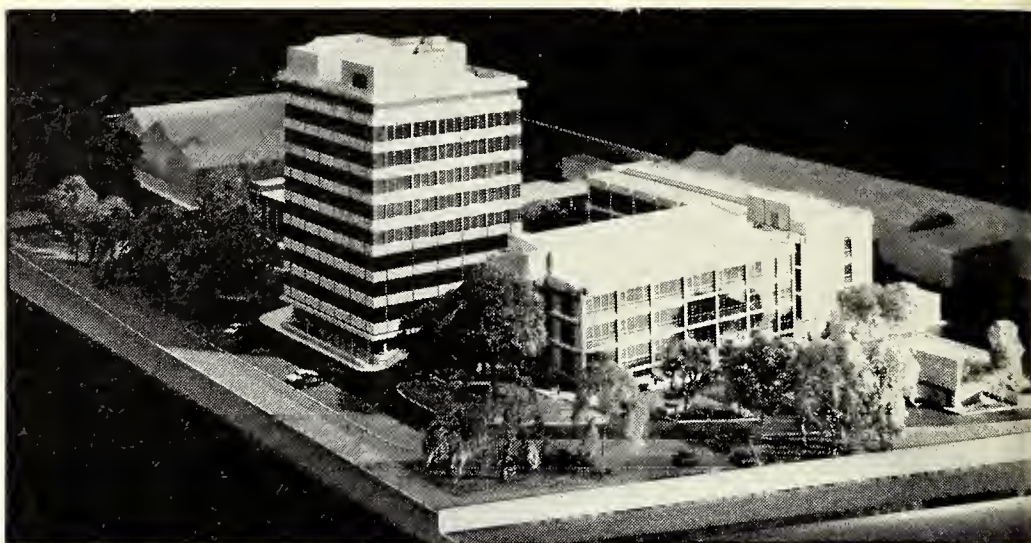

Osmond Aerosols

The third stage of a £250,000-development programme by Osmond Aerosols Ltd at Grimsby, due for completion in February 1971, will bring the company's production capacity to a total well in excess of 154m aerosols a year.

This final stage in the company's current expansion plan at the South Humberside Industrial Estate follows the transfer of production from the Talbex Ltd (Osmond Aerosols' parent company) plant at Winsford, Ches, to Grimsby. The Winsford factory and plant has been sold for £36,900.

Stage two of the 6½-acre site development, completed less than a year ago, provided facilities for filling and handling up to 10m aerosols a year.

The latest development will consist of

Model of the new laboratory and office complex for Bush Boake Allen at Walthamstow, London

additional warehouse space, canteen facilities, office accommodation and laboratory facilities and a further high speed filling line will be in operation by the spring of 1971.

In brief

Sutton & Sons Ltd, the Reading seedsmen, had pre-tax profits of £97,053 for the year ended May 31 (1969: £107,234). The profit does not include the profit earned by the subsidiary D. R. Collins Ltd/Goya Ltd. Additional operating expenses of £154,941 were largely offset by a 26 per cent increase in seed sales.

Nadel & Wright Ltd: Creditors of Nadel & Wright Ltd, druggists, 62 Park Street, Wokingham, Berks, recently confirmed the voluntary winding up of the company with Mr Monjack, of Leonard Curtis & Co, 13 Wimpole Street, London, W1, appointed as liquidator.

Wilkinson Sword Ltd and Colgate-Palmolive Ltd jointly announced recently that with effect from December 1, Colgate-Palmolive would assume sole distribution in the United States of Wilkinson Sword's existing shaving products.

Greeff-Chemicals Holdings Ltd.: Trading profit for half-year to June 30 was £66,746 (against £66,051 in the equivalent 1969 period). After the addition of income from investments and deduction of corporation tax the profit is £205,409 (£167,314).

Millipore (UK) Ltd have moved to Millipore House, Abbey Road, Park Royal, London NW 10 (telephone. 01-956 9611). The company plan to open an office in Dublin in 1971.

Roger & Gallet Ltd are moving on November 1 to larger premises at 17 Lettice Street, London SW 6 (tel: 01-736 0259).

J. L. & K. G. Edwards are to close their branch pharmacy at 97 Royden Road, Overchurch, Upton, Wirral, as from November 1.

Dunbec-Combex-Marx Ltd had a group net trading profit of £78,037 in the first half of the year against £75,511 in the same period of 1969.

S. A. Shepherd & Co Ltd have moved to 22a High Street, Hampton Hill, Middlesex (telephone: 01-977 7704).

Appointments

Smith & Nephew Pharmaceuticals Ltd have appointed Mr Harvey-Kelly the field manager. He has been the Southern area manager since 1967.

Boehringer Ingelheim Ltd: Dr G. F. Ha greaves has been appointed chairman of the board. He will continue to act in an executive capacity as managing director of the company.

Bristol-Myers Co Ltd have appointed Mr John Veitch field sales manager. Prior to this promotion, Mr Veitch, who joined Bristol-Meyers in 1950 as one of the company's original salesmen, was regional sales manager for the south.

International Chemical Co Ltd have made the following appointments. Messrs P. J. Houghton, field sales manager; D. J. McGuigan, London divisional manager; Clarke, key accounts manager; J. N. Runsey, assistant house account controller southern division; and A. Humberston product manager, proprietary medicines.

Carlo Erba (UK) Ltd have appointed the following representatives: Mr H. R. Mar (for North Lancashire); Mr P. Rickett (Bradford, Barnsley district of Yorkshire); Miss A. J. Cornish (North Staffordshire); Mr W. J. Smith (Oxford, Buckinghamshire and Berkshire); Mrs L. Brockdorff (North London); Miss M. F. Campbell (Essex) and Miss M. Crane (Middlesex). Mrs E. Hogg has been appointed sales administrative executive.

School of Pharmacy, Portsmouth: B. V. Barry, BSc, PhD, MPS, has been appointed reader in pharmacy in the School of Pharmacy, Portsmouth Polytechnic. Mr Barry graduated in pharmacy at Manchester University in 1960. After a period in retail with Boots Ltd and industry with Parke, Davis & Co, he joined the School of Pharmacy, University of London as assistant lecturer in pharmaceuticals in 1966 and was appointed lecturer in 1966.

He was awarded a PhD degree in 1969 and joined Portsmouth Polytechnic as senior lecturer in pharmaceutical technology.

PEOPLE

Mr Mervyn Madge, a member of Council, has been elected vice-chairman of the South-west Regional Home Safety Council.

Dr George H. Hitchings, vice-president in charge of research at Burroughs Wellcome & Co's new United States headquarters in North Carolina, flew to London last week to take part in a symposium on the mutual potentiation of trimethoprim and sulphonamides.

Dr Hitchings and the research team he heads have chalked-up a number of successful drug innovations, the latest be-

ing trimethoprim (marketed in the UK as Septrim). He told the *C&D* that the list of bacterial diseases against which trimethoprim had been found useful was growing. There was evidence, he said, not yet published, which showed it to be effective in cholera.

Asked how long it had taken to develop the drug, he replied that it was one of several useful drugs that had evolved from a programme of research begun as far back as 1942.

During that time Dr Hitchings has received many awards, among them that of the Passano Foundation.

Deaths

Richards: Recently, Mr Charles Richards, MPS, 27 Hamilton Road, New Brighton, Wallasey, Cheshire, aged 81. Mr Richards qualified in 1920 and was a proprietor of a pharmacy in Wallasey for 43 years until retiring in 1964.

News in brief

The Consumers Association has published a new paperback "Health for Old Age" (10s post free from the Association, 14 Buckingham Street, London WC2).

Now that the work of the Standing Joint Committee on the Classification of Proprietary Preparations has ended (*C&D* October 3, p 445), the Health Services Councils are proposing to make alternative arrangements for advising the Health Ministers on the status of certain borderline substances (preparations which possess the characteristics of both a drug and a food or toilet preparation).

The Xrayser column

The young apothecary

I found the comprehensive account of the proceedings at Dunblane (last week, pp 544-5) of the greatest interest. Those attending the conference of Scottish pharmacists seem to have put in a hard and profitable day, and I am certain readers will be grateful for the full report they have been given. I was particularly interested in the address of Professor Stenlake and its implications in regard to pre-registration employment. To one who was trained under very different conditions, the changes in pharmaceutical education have been fascinating.

The system has undergone complete transformation, for in my early days in pharmacy it was thought necessary to spend four years as an apprentice before proceeding to college for what might be termed the spit and polish before kit inspection. And if one was fortunate enough to spend the early and formative years in a well-run pharmacy, with an interested mentor, the experience was one of lasting value.

The processing of crude drugs, the preparation of tinctures and fresh infusions, the making of pills, suppositories and emulsions, was a gradual process of absorption which, to quote Professor Stenlake, "brought manipulative skills to a high degree of efficiency" — an objective which is as important today as it was some decades ago. But, of course, modern pharmaceutical practice does not call for the same range as those earlier years.

Yet, with all the hardly-won knowledge, the present graduate is still found, at the end of his course, to be in need of a period of experience in practising conditions, under the care of an interested mentor, before he can be adjudged to be competent to take complete charge of a pharmacy. Many of the prerequisites mentioned by the speaker differ little from the skill and knowledge — to quote the words on the earlier certificate of qualification — acquired as a matter of course during the old apprenticeship. Professor Stenlake opposed any reduction in the length of pre-registration employment, but he said that he could not justify a longer period. And so long as the graduate recognises that, even after one year, he has still a great deal to learn, all may be well.

Schedule four labelling

Like many other pharmacists, Mr W. M. Darling (president of the Pharmaceutical Society) is concerned over the lack of written directions on prescriptions for Schedule 4 preparations (p 525). He is quoted as saying that Rule 13 of the Poisons Rules should be amended to permit of the pharmacist specifying the dose if the prescriber's intentions were known to him, and those could be ascertained in a number of ways. The pharmacist would then endorse the prescription accordingly and append his signature and would write the dosage on the label.

Short of direct contact with the prescriber, I cannot think of any other way which would be reliable. The patient's word would be of little help, for notoriously the verbal instructions of the doctor make no lasting impression. I cannot think why the doctor, who has examined his patient and made his diagnosis, should then leave his treatment to chance. He must be made to realise the hazards involved in his remissness.

Crisis averted

The boy laid the modern equivalent of four half-crowns on the counter, lifted a parcel containing four items, and departed. He reappeared almost immediately to say that Father expected five shillings change, on the strength of which he was half-way through a haircut, and the barber had suspended operations until he saw the colour of his money. Pharmacy, with ready and nonchalant resignation, was equal to the occasion.

Two great new products from the makers of Angiers Junior Aspirin.

Angiers Children's Soluble Aspirin.

Each tablet contains Aspirin 150mg., Calcium Carbonate 50mg., Anhydrous Citric Acid 15mg.
24 tablets cost 3/-. (15P)

Baby Pain Relief.

Cherry flavoured Paracetamol Elixir, Paediatric,
B.P.C. 100ml. cost 5/3. (26P)

These two great new products complete the range of Junior analgesics from the makers of the brand leading Angiers Junior Aspirin.

Both products—and Angiers Junior Aspirin—will be available from the wholesalers listed opposite or your Bristol-Myers representative, on bonus terms.

They'll sell because heavy advertising will start in women's magazines next week.

On average, 90% of mothers with young children will see these advertisements 6 times.

So place your order now. Because if there isn't a huge demand it means kids have stopped having aches and pains.

And we all know how likely that is.

And where to get them all.

(On Bonus Terms).

Over-the-counter medicinals

Children's analgesics

Two additions to the Angiers range of children's analgesics are Angiers children's soluble aspirin and Angiers baby pain relief. Each children's soluble aspirin tablet contains aspirin 150mg, calcium carbonate 50mg anhydrous citric acid 15mg. Pack is 24 tablets (3s).

The baby pain relief is cherry flavoured paracetamol elixir, paediatric, BPC in a 100ml pack (5s 3d). Bonus terms are available from representatives or the wholesalers listed in the company's advertisement in this issue. (Bristol-Myers Co Ltd, Stonefield, South Ruislip, Middlesex.)

Crookes trio

The Crookes Laboratories Ltd announce the launch of three new proprietary products in the Granada television region. Crookes cough gel (15s 9d) for children is a non-spill, pleasantly flavoured, easily administered gel for the relief of children's coughs. Crookes inhalant capsules (3s 11d) provide an aromatic non-staining inhalant in soft gelatin capsules in a new push-through pack. The inhalant may be used on the handkerchief, pyjamas or as a conventional inhalation in hot water. Crookes inhalant tissues (4s 3d) are soft impregnated nasal tissues designed to provide relief in nasal congestion.

Special bonus terms are available until the end of October and television advertising commences on November 11 on Granada Television. Advertising will feature the individual products "linked by a strong 'Ask your chemist' theme." A display unit is also available. (The Crookes Laboratories Ltd, Telford Road, Houndsmills Estate, Basingstoke, Hants.)

More from Revillon

New additions to the Parfum Revillon range include the Detchema parfum atomiser de sac 7 cc (£4 15s); Crepe de chine Eau de Cologne spray, refillable, 56 cc (37s 6d); Carnet de bal eau de Cologne spray, refillable, 56 cc (41s); and Eau Fraiche spray refillable, 56 cc (43s). In the Partner, men's range, there is an

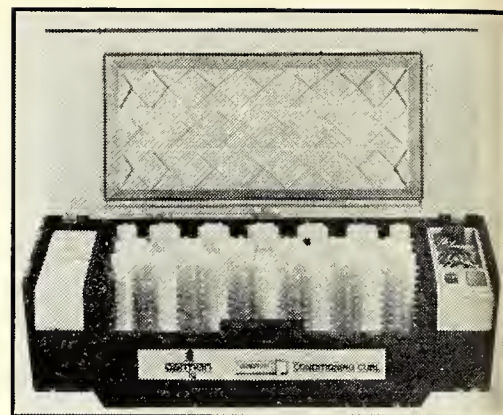

eau de Cologne flacon, 84 cc (31s 9d) and an after shave lotion flacon, 84 cc (21s 6d). (Parfum Revillon Ltd, 67 Effra Road, London, SW 2.)

Sundries

Carmen conditioning curl

The Carmen Conditioning Curl is the latest heat retaining roller from the Carmen Curler Co. It may be used in three ways: To give a "deep-conditioning treatment" setting and curling the hair at the same time; To set hair with steam mist using water to moisturise, as the hair is set and curled; and also for normal dry speed-setting using the rollers dry as with the other Carmen Heat-Retaining Rollers, for a quick lasting hairset.

The Carmen Conditioning Curl (£14 19s) has 20 heated rollers in three sizes and 12

measured treatments of Carmen conditioning lotion. Conditioning lotion refills will be available. (The Carmen Curler Company Ltd, Carmen House, 223-231 Old Marylebone Road, London, NW 1.)

acne and how the pharmacist

There are many thousands of Acne sufferers in this country today and a high percentage of these prefer to seek the advice of the local Pharmacist rather than consult their G.P. In these cases, you, the Pharmacist, can confidently recommend Quinoderm Cream to help your customer overcome a condition which in many cases can have adverse psychological effects. At the same time you can help yourself to the good return which Quinoderm allows you.

Exclusive Pharmacy Product

Quinoderm is exceptional in that it is only available from YOU the

pharmacist. There is no competition from beauty shops, chemist stores or supermarkets giving you the sole right to recommend a first class product.

Clinically Tested

Quinoderm has undergone extensive trials by many leading dermatologists and in a recent trial results were described as "excellent" or "very good" in the cases of Acne Vulgaris treated with this clean, simple and inexpensive product. Trials included both Quinoderm Cream and Quinoderm Hydrocortisone (Quinoderm Hydrocortisone).

HELP YOUR CUSTOMER—HELP YOURSELF
recommend Quinoderm Cream for the treatment of Acne

Quinoderm Cream is a formulation of Potassium Hydroxyquinone Sulphate (0.5%) and Benzoyl Peroxide (10.0%) in an astringent cream.

THE QUINODERM COMPANY

TRADE NEWS

Berk Pharmaceuticals take over Antabuse

Berk Pharmaceuticals Ltd, Shalford, Surrey, announce that they have been asked to market Antabuse, for the treatment of alcoholism, under licence from Dunex. Antabuse was previously mar-

keted by Albion Laboratories, who have relinquished their interest in the product.

Berk propose to market Antabuse in a 200 mg tablet form to replace the previously available 400 mg tablet and reduce side effects. Since Albion stocks of the 400 mg tablet have now run out, supplies will be temporarily suspended until November 2.

Schick Electric distribution changes

Carmen are adding the Schick range of personal care appliances to their already famous Carmen heat-retaining rollers.

The Schick brand will be maintained to the consumer, but the range of Schick products will be marketed, sold and serviced with the backing of The Carmen Curler Company Ltd, Carmen House, 223-231 Old Marylebone Road, London, NW 1.

Currently, Carmen will be concentrating their efforts on the two best-selling Schick rigid hood hairdryers. The Consolette model 307 (£14 19s 0d) and the Consolette Capri model 315 (£16 19s 0d).

Organidin relaunched

WB Pharmaceuticals Ltd, Fulton House, Empire Way, Wembley, Middlesex, are re-launching Organidin, previously marketed by Denver Laboratories Ltd. Organidin 2,3-(2- and 3-iodopropylidenedioxy) propanol is said to increase the flow of thin respiratory tract secretions, mobilise the thick, tenacious mucus and render it more fluid.

Organidin is offered as an elixir in containers of 200 ml (12s) and 2 litre (114s); as tablets containing 30 mg in containers of 100 (10s) and 250 (23s). There is also a solution, each ml containing Organidin 50 mg. Pack is a container of 25 ml (5s 9d). Dosage: elixir, one 5 ml spoonful four times daily; tablets, two tablets four times daily; and solution, 20 drops four times daily in liquids.

Gaviscon formula

Reckitt & Colman's new speciality Gaviscon granules contains in each 5 g, alginic acid 0.521 g, sodium alginate 0.521 g, magnesium trisilicate 0.052 g, dried aluminium hydroxide gel 0.208 g, and sodium bicarbonate 0.177 g, in a chocolate flavoured base containing 2.1 g sucrose. The sodium alginate content was omitted from a recent advertisement.

Additional pack

Hoechst Pharmaceuticals Ltd, Hounslow West, Middlesex, have introduced a 500 pack of Synadrin 60 (494s 3d). They are withdrawing Synadrin 15 mg tablets on December 31.

Bonus offers

Pan Britannica Industries Ltd, Britannica House, Waltham Cross, Herts. Bio and Pbi range extra 6 per cent discount. With every 20 packs of lawn products (Toplawn, Autumn Toplawn and Velvas G), a free, metal Toplawn Spreader.

Kathleen Court (England) Ltd, 67 Effra Road, London SW 2. Coolmist spray deodorant-anti perspirant. 15 invoiced as 12. Adam, lanoline skin lotion and brushless shave cream, facial youth rejuvenating cream and Embadren anti-rheumatic cream (tubes and jars) 14 invoiced as 12.

Laboratories for Applied Biology Ltd, 91 Amhurst Park, London N16 5DB. Per-nomol. 13 invoiced as 12 (until November 30).

E. C. De Witt & Co Ltd, Leyton, London E 10. Cymex. 13 invoiced as 12. Secron. 14 invoiced as 12.

Crookes-Anestan Ltd, Rankine Road, Daneshill Estate, Basingstoke. Hermesetas 300. 13 invoiced as 12.

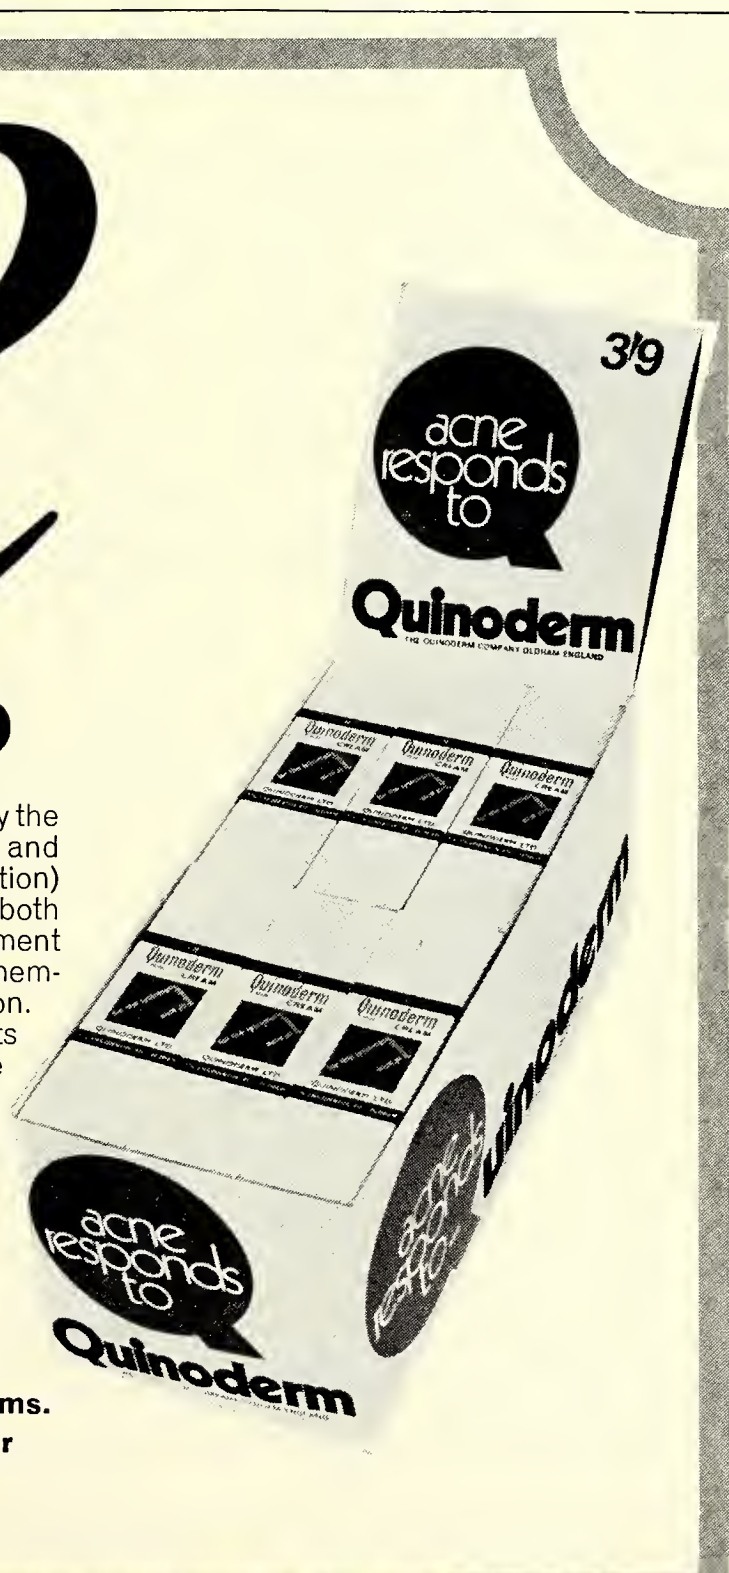

Eli Lilly & Co Ltd, Basingstoke, Hants, announce that as from November 2 an additional 5 per cent discount for orders of Lilly products totalling £25 and above purchased through wholesalers.

Can help

is, of course, restricted by the Therapeutic Substances Act and is only available on prescription) led to the adoption of both products as standard treatment for acne by many leading members of the medical profession. Quinoderm, apart from its therapeutic effect, has the added advantage of invisibility when applied to the skin, therefore does not cause further embarrassing attention to a condition in which the sufferer is often already acutely sensitive.

PROMOTIONS

Supersoft aim for lead in hair care market

Last week's announcement of big changes in the Supersoft hair care range are being brought to customers' attention with massive nationwide advertising on TV and with full-colour spaces in women's magazines. The changes are claimed to involve the biggest and most varied programme of improvements ever mounted for a major brand in one operation. Supersoft hairspray is said to be "the big spender" in advertising. To date, its appropriation has been about double that of its nearest competitors, and the new promotional programme is to use a new Supergirl advertising theme.

The hairspray market stands at around £16 million and has a current growth rate of 10 per cent. Together with shampoos it accounts for no less than one-third of the women's toiletries market, which in turn is the biggest of the five categories that make up the total £242 million health and beauty aids market.

The latest Supersoft changes are designed to ensure increased market domination for the hairspray and to secure brand leadership in the shampoo market. (Reckitt & Colman Toiletries division, Sunnysdale, Derby.)

Meggezones "strong one" image

White Laboratories start an extensive newspaper advertising campaign on October 26 for Meggezones pastilles.

In a recent survey, consumers indicated Meggezones as "the strong one"—and this provides the theme for the advertisements. The schedule covers both national and local daily and Sunday newspapers. (White Laboratories Ltd, Penarth Street, London SE 15.)

Fragrance sprays for Christmas

Lenthéric have produced for the Christmas shopping period only a new small aerosol fragrance spray in Tweed Bouquet (17s 5d) and Miss Lenthéric eau de toilette (16s 3d), holding 34g of fragrance.

The glass container has a cut-glass effect and is finished with a ribbed overcap ("finned" inside to ensure a secure fit) in

Tweed green or Miss Lenthéric pink. (Lenthéric Ltd, 17 Old Bond Street, London W1.)

"Winter tan" bonus

Ambre Solaire Duo tan "for the healthy tanned look this winter" is the slogan appearing on displays of six tubes and six bottles available until November 27. During the promotional period a bonus of 12 charged as 11 is offered to retailers taking the display unit (pictured right).

Available as cream or lotion, Duo tan is claimed to give a deep even tan in or out of the sun. "What better than a spot of sunshine in a Christmas display?" ask the makers. (Golden Ltd, Berkeley Square House, Berkeley Square, London W1.)

Norsebad as a gift

Christmas sales of Norsebad can be boosted by a special crowner suggesting "Give Norsebad—with love".

Launched in May, Norsebad is said to have already taken a large share in the bath additive market. Large-volume sales came with the start of the nationwide advertising campaign, which is scheduled to run until December, with a special Christmas theme. (Nicholas Products Ltd, 225 Bath Road, Slough, Bucks.)

Kiddies Supershop offer

As a seasonal offer, Smith & Nephew, manufacturers of Elastoplast, are offering a Kiddies Supershop to the consumer. It is made of tough corrugated board and is large enough for children to play inside. It is 4ft 1in high, 3ft 4in wide and 2ft 7in deep and will make the ideal Christmas gift. It can be obtained from Elastoplast for only 48s, whereas the retail price would be over £5, it is stated.

A special pre-packed merchandiser and other promotional material is also being produced.

The offer will be extensively advertised in *Woman's Weekly* and *Family Circle* with full pages in colour. Other full page advertisements will appear in *TV Times* and *Mother Magazine*. (Smith & Nephew Ltd, Bessemer Road, Welwyn Garden City, Herts.)

More consumer offers

□ Kathleen Court have available the following special offers:— Bath bobs (a Netlon bunch of coloured bath oil capsules), regular price 4s 3d to sell at 2s 10d; Gift basket (containing crown size bath soap), 11s to sell at 6s 10d; Eau de toilette (sprinkler flask in clear-view pack), 11s to sell at 5s 3d; Gift basket (containing Eau de toilette), 17s 6d to sell at 8s 6d; Staffordshire ware trinket set (containing open rose shaped soap), 17s 9d to sell at 11s 6d; Staffordshire ware trinket set (containing cleansing puffs), 21s to sell at 13s 6d.) Also available is Kathleen Court bath soap, 10 oz, to retail at 3s. (Kathleen Court (England) Ltd, 67 Effra Road, London SW 2.)

□ Parfums Revillon. With a purchase of any item from the Detchema range, the consumer will receive a free Detchema drum talc, retail value 39s 6d. With a purchase from the Crepe de Chine range

of £2 or more, the consumer will receive a free perfume purse-size pursette, retail value 41s. Stockists purchase basic stock items for either promotion and receive the equivalent number of talcs or pursettes. (Parfums Revillon Ltd, 67 Effra Road, London SW 2.)

□ Nightdress and negligee set in double nylon, in a choice of seven colours, for 35s, a saving of £1 on normal retail value. To qualify for the offer, the consumer must buy either Cuticura soap, talcum powder or hand cream. Supported by advertising in leading women's magazines and point-of-sale material. (Cuticura Laboratories Ltd, Clivemont Road, Cordwallis Trading Estate, Maidenhead, Berks.)

□ Free Lady Jayne roller with small bottles of Twice as Lasting setting lotion. Until November 27. Trade bonus of 12 charged as 11 during the promotional period. (Golden Ltd, Berkeley Square House, Berkeley Square, London W1.)

OBESITY: THE HEALTH

The first of two articles by Mr N. Santer, MPS, FRSH, a director of Servier Laboratories Ltd.

Among the affluent countries of civilised society the incidence of overweight has increased to the extent that it is now estimated that almost half the population of the United Kingdom is carrying excess weight.¹ At the outset I must make it clear that in considering excess weight I am in reality referring to excessive adiposity and accumulation of lipid tissue. It is important to differentiate between apparent overweight caused by increases in the protein tissue or bone structure of the body and that caused by the increase in size of the adipose organ².

It can be shown that the rate of increase in mortality is proportional to the degree of overweight. A man who is 20 per cent overweight has a 125 per cent greater chance of an early death³.

There are many conditions from which death may occur in the obese. It is well known that diabetes, cardiac disease and circulatory disorders are more common among the overweight than among the lean. However, cancer, pneumonia, influenza and diseases of the digestive system are also increased among the obese and it has even been shown that, because of their slowness, the overweight are more prone to accidents. Fortunately, just as stopping cigarette smoking reduces the risk of lung cancer, so reducing weight largely eliminates excess mortality risk.

Until recently, the concept of positive energy balance has been the major philosophy in obesity. It is held that people become obese because they overeat. Therefore, their caloric intake exceeds their caloric expenditure, the balance being laid down as fat. However, lean people have the facility to metabolise excess food intake to the extent of causing an increase in body temperature. So although it may be correct to say that reduction of caloric intake should produce weight loss — and, indeed, does so in many cases — a means ought to be found to give the obese patient the metabolism of the lean person so that he does not have to face lifelong denial of food intake.

Over the years many methods have been adopted in an attempt to overcome the problem. Dietary restriction has always formed a basic treatment of obesity. It is important, however, that diet should be carefully balanced. It has been shown that diets high in protein and fat give a greater weight loss than diets composed mainly of carbohydrate, irrespective of the fact that the caloric content of the diets is constant. Diets deficient in carbohydrate have also been shown to lead to ketosis and increase in uric acid levels⁴.

It used to be thought that the thyroid gland in the obese subject was deficient. Therefore, thyroid hormone has been administered in an attempt to stimulate metabolic rates. Unfortunately, near toxic doses of thyroid or thyroxine are required in euthyroid patients to produce any effect⁵. Injections of chorionic gonadotrophin have been given to patients, but controlled studies against saline injections suggest that any weight loss is due to frequent visits by the physician and the consequent stimulus of encouragement⁶. Total fasting is employed but has certain hazards because the weight loss produced is mainly due to water and protein loss, leading to protein deficiency, electrolyte disorders, normochromic anaemia, malabsorption of vitamin B₁₂ and, in some cases, death⁶.

For what has been described as "uncontrollable" obesity, jejunio-ileal shunt operations have been employed. Again, this is a hazardous procedure and five people out of a series of 38 died from various causes during or following surgery⁷.

Many proprietary preparations containing methylcellulose are on sale to the general public. The theory is that methylcellulose, when taken with liquid, swells in the stomach to produce a feeling of satiety. Again, controlled studies have not revealed greater weight loss than with placebo⁸. Recently, it has been shown that obese persons, fasted for one to two days, exhibit lower urinary levels of the fat mobilising substance (FMS) than normal subjects similarly fasted⁹. FMS increases fat mobilisation and catabolism and may play

a role in normal fat metabolism⁹. It has been suggested that body fat stores tend to increase when a relative deficiency of FMS exists. This view finds some support from the observation that, on injection, FMS produced increased weight loss and stimulated the mobilisation and breakdown of body fat in obese patients on a constant diet¹⁰. Of particular interest also, is the observation of Pawan¹¹ that human subjects, fenfluramine appears to increase the output of FMS. Further work on this important aspect of body fat metabolism is being carried out.

Remaining treatment rests in the application of appetite depressant drugs and development of them having activities in the metabolism of the obese. These drugs have the structures shown below.

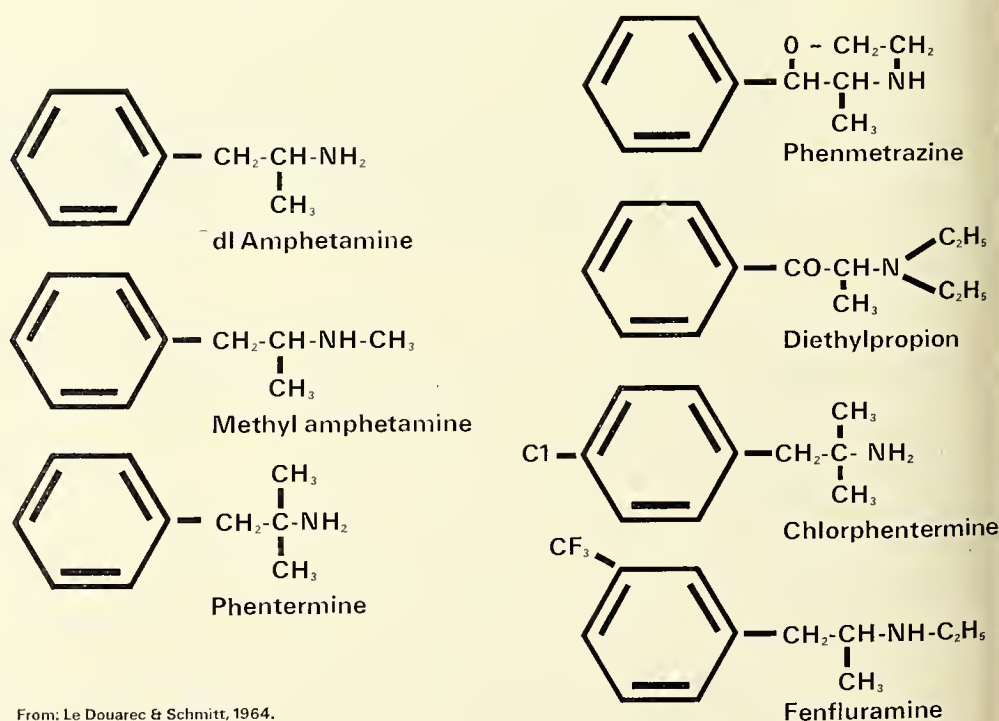

Unique structure

It will be seen that one drug, fenfluramine, has a trifluoromethyl substituent which is unique and which may offer a key to the entire problem of obesity.

All the drugs are derivatives, in some way or other, of amphetamine and it is probable that the bulk of what is now used legally is prescribed for suppression of appetite or the alleviation of depression. A substantial body of authoritative opinion holds first use to be unnecessary and the second largely ineffective.

A British Medical Association working party recommended in 1968 that amphetamine-like compounds should no longer be prescribed for obesity and suggested fenfluramine as a suitable alternative.

The actions of the amphetamines are

From: Le Douarec & Schmitt, 1964.

HAZARD OF OUR TIMES

interesting, but much of the evidence is contradictory in that it was held for a long time that they acted as appetite distractors through their stimulant effects.

The BMA working party admirably summed this up:—

"The amphetamine compounds affect food consumption indirectly by an action on carbohydrate and fat metabolism and directly through an action on the brain. The anorectic action on the brain is exerted through cortical centres, and through the satiety and feeding centres in the hypothalamus. New light is at present being thrown on the degree to which stimulation of the central nervous system and production of anorexia may be co-existent and interdependent. In 1965, it was suggested (as a result of the investigation of the anorectic action of dexamphetamine in obese schizophrenic patients in whom it was shown that the drug had no effect either on their appetites or sleeping patterns), that the two pharmacological effects of central stimulation and production of anorexia are inseparable because they originate from the same pharmacological mechanisms (Modell and Hussar, 1965). This association of stimulant effects has also been observed in the case of phenmetrazine when it is used therapeutically for its anorectic action. More recent evidence suggests however, that this view may be modified with diethylpropion and phentermine, the central stimulant effects of which are similar to those produced by phenmetrazine but the anorectic effects are more pronounced. Investigation of the effects of chlorphen-

termine and fenfluramine show that a dissociation of central stimulation and anorectic action can be obtained. This appears to be associated with the presence of the halogen on the phenyl group and the ethyl radical at the end of the side-chain. This experimental evidence showing the dissociation of anorectic and stimulant effects is supported by the clinical finding that fenfluramine produces a significant weight loss in obese chronic schizophrenic patients."

Symptomatic therapy

These drugs as a group, therefore, relieve or distract from the symptoms of hunger. Apart from fenfluramine and chlorphentermine, they have stimulatory effects on the central nervous system and on the cardiovascular system, and they produce physical and psychological lift, having become drugs of abuse. According to Wilson¹² they are dangerous drugs being used for symptomatic therapy (to relieve the symptom of hunger), in the treatment of what is a lifelong disease — obesity — despite the fact that their anorectic effect is brief.

Many patients control their weight without ever going to their doctor. For example, the anorectic drug bill for this year is expected to be about £2 million, whereas it is estimated that £40 million will be spent by patients themselves on over-the-counter anti-obesity agents, health clinics, etc. The patients who attend their doctors for treatment of obesity must, therefore, expect more than diet control and, as Yudkin points out¹³,

they expect their doctors to play an active role. Perhaps a higher percentage of success might be obtained in the treatment of obesity by less rigid devotion to concepts of diet, drugs and various devices and more flexible attention paid to the total status of the dieting patient.

The drug industries and the majority of doctors have aimed at treating obesity by attempting to control the symptoms of hunger; for example, Yudkin found from his 1968 survey of doctors' treatment of obesity, that 50 per cent of doctors prescribed an appetite suppressant drug along with advice and diet at the initial consultation and 20 per cent more of the doctors turned to these drugs when diet appeared to be failing.

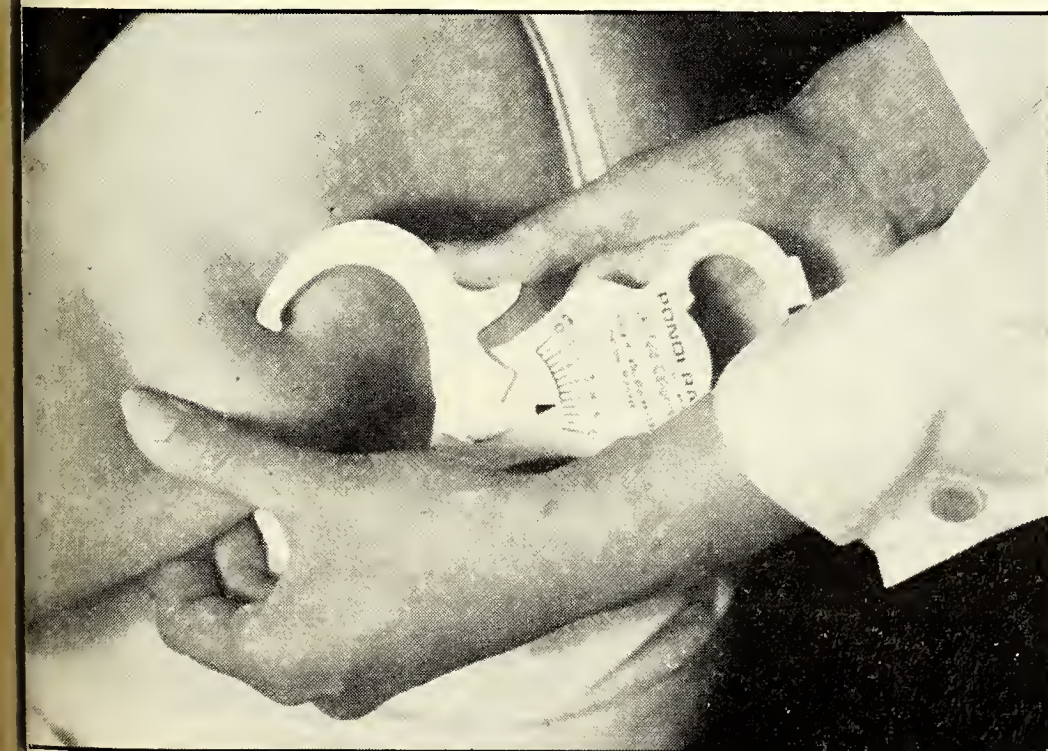

A lot has been written about the incidence of emotional illness in obesity, but there is no convincing evidence so far of any higher incidence of emotional illness in these patients except, of course, those patients with compulsive eating, excessive nibbling and night eating.

Their attitudes towards doctors and drugs needs examining carefully, since they are a self-selected group of patients and the answer to their treatment may not lie so much in the use of drugs as in trying to understand and alter their social and familiar environment. In this context, it is interesting to note that there is more obesity in the lower social groups; and that about 80 per cent of patients taking slimming tablets are obese middle-aged housewives^{14,15}.

It is an area needing careful social, psychiatric and epidemiological research and as Park *et al* have demonstrated¹⁶, even in short term drug evaluation, the doctor-patient relationship was more important to the patient than the various research procedures.

Measurement of skin-fold thickness provides a guide to the degree of obesity

LETTERS

Hospital inequality

Your recent article on the pharmacy department at Northwick Park Hospital showed how pharmacists are taking an important role in modern hospital planning.

My initial optimism on reading of this progress into the 70's of hospital pharmacy was soon disillusioned on reading an advertisement in a national newspaper for an equipment officer at this hospital offering a maximum salary of £2,862—and this was an assistant to the supplies officer.

This salary can only be equalled by a category V chief pharmacist. Salaries in hospital pharmacy are still deplorable and have a long way to go before they catch up with other grades in the hospital service.

B. T. Hardy
Warrington, Lancs

Early days

Referring to Xrayser's column in the *C&D* of September 26, I may state that in my first situation, when I came to London as an improver, my hours were from 8 am to 10 pm daily and 8 am to midnight Saturdays with one evening off at 6 pm and an hour in the morning for exercise.

I hardly need add that after about 12 months of this, I changed to a job which finished about 8 pm. Even then we had no half-day as the Early Closing Act was not then in force. It was a boon when it did become law.

Although I am still hard at it (now aged 84) I preferred the days when we could take a pride in our work, for which we were trained, making and gilding and silvering pills, tablets, etc. and every preparation in the then BP. Those were the "good old days."

Script charges

Your correspondent Isca (last week, page 538) goes too far in calling the prescription exemption scheme "a farce." I would counsel him to think of the alternative(s) and to remember the previous prescription charge scheme.

He may recall that in those days the only people "exempted" were those in receipt of supplementary pensions and even then they had to finance the transaction before they received the medicine. They paid the 2s, then asked for a receipt which they took to the post office for the refund. To many sensitive people this need to ask for a receipt in an open shop must have presented great embarrassment.

Your correspondent may even recall the need for him to "finance on trust" the prescription for an infant whose parent did not have or was awaiting cash. It would not be unknown to him to be asked by a poor person with a number of items

on a script to choose the most important one "as I have only 2s till the end of the week" and even perhaps meet the situation of a mother handing in a prescription for her infant on a Tuesday and saying "I'll collect it on Friday" (pay-day).

This present scheme is not a farce, Isca. It may put us to considerable trouble but it does mean that the patient gets the prescribed medicine at the required time and without having to consider the family budget.

John B. Grosset,
Edinburgh

Working party

So the individual contractor pharmacist has been well and truly led up the garden once again; the working party on a revised NHS contract demanded by the unanimous vote of the recent conference has been carefully sabotaged before it can even commence its task.

Of its composition we will say little; we do not intend to criticise individuals and, in any case, the majority were a natural choice. From the Central Committee one could not really envisage other than those selected—the chairman, Mr David, was an obvious choice and a representative from the multiples, such as Mr Ross, an essential. And who can imagine any other to represent the Society than its President? From his outspoken remarks of recent weeks he would appear to be more than capable of speaking on behalf of the individual contractor—we wish him all success.

It would appear to have been more expedient, however, to have endeavoured to obtain a chairman from outside the profession.

For any working party such as this, whose findings (if they are to have any effect) must be unbiased and convincing not only to the department but to the general public also, one would have thought that someone such as Sir Alec Douglas Home or Mr Wedgwood Benn (for whom, in view of his recent remarks, the experience could have proved educational as well) might have been more appropriate and carried far more weight.

As regards the terms of reference, however, they would appear to be deliberately designed to render it impotent and quite incapable of even beginning to carry out the object for which it was created. It can, apparently, discuss anything it likes except the one thing demanded of it by the unanimous vote of the profession.

As two pharmacists, very closely connected with the North-east London proposals, which—because they incorporate a suggestion of planning—are not even eligible for discussion, may we suggest that every individual contractor should write at once to his Local Pharmaceutical Committee, insisting that they support any demands which come forward (and, unless the profession is completely apathetic, such demands must of necessity be speedily forthcoming) to insist on a complete revision of terms of reference to leave the working party free to discuss all aspects of *whether a new contract is necessary*.

Private contractors, you have been taken for a ride once more; make your voices

heard where they will do most good: tackle your LPC *en masse*—it may well be your last chance ever to take effective action.

Marley's complaint

In his tongue-in-the-cheek review of "Medicines That Protect Us" (*C&D* October 17) it is a pity Xrayser did not penetrate any deeper than the antiquated opinions of Old Dr Marley. He would have found that the Doctor's views are hardly representative of his profession.

If the Doctor does not believe that future generations will demand and expect medicines that work within 24 hours, he must be lamentably ignorant of the take-it-for-granted attitude in our "gimme" society. It is manifest in the manner people demand and expect a house on the council, free education for their offspring and a host of other Welfare State perks.

People increasingly regard these items as their natural prerogative—and they are coming round to thinking that continuous good health should be included in the category, too.

And why not?

Xrayser correctly intimates that "Medicines That Protect Us" was designed for public, not professional, consumption. The publishers of the booklet, the Association of British Pharmaceutical Industry, feel that doctors are sufficiently aware of the benefits of medicines and the achievement of the industry, but that there was a case for clearing up some public misconceptions in this sphere.

As such, "Medicines That Protect Us" has been exceedingly well received. In the three weeks since publication, an initial stock of 120,000 copies has been exhausted, many thousands being distributed in response to specific requests from doctors.

In view of this response, including a number of congratulatory letters from doctors, the ABPI has organised a substantial re-run to meet orders. Unsolicited comments from *doctors* have included the following: "Excellent," "Very enlightening and most welcome," "Very useful," "Congratulations, this is a very good booklet." Pharmacists have not been less enthusiastic.

The publication has also met with a favourable response from large numbers of local authorities, hospital management committees, dentists, librarians, nursing schools and headmasters.

Peter Pallot
Information Officer, ABPI

Thanks to voters

I would like to thank all those who voted for me at the recent NI Council election. My congratulations to those elected and my best wishes to the whole Council in future dealings with the many difficult problems faced by pharmacists in general practice, in hospital and in industry.

It is disappointing to find that the wishes of 20 per cent of the voters (over 140) could not be taken into account because of a technicality.

PROFESSIONAL NEWS

Irish Pharmaceutical
Congress

Sligo banquet told of health service set-back

There was a surprise announcement by the Minister for Health, Mr Childers, at the Banquet which brought the Irish Pharmaceutical Congress to a close in Sligo on October 14, to the effect that it was not intended to bring the Health Services scheme into operation for the entire country, as arranged, on April 1 next.

The intention now, said Mr Childers, was to put it into effect only in the Eastern Health Board area — Dublin County and City and Counties Wicklow and Kildare. The scheme for the rest of the country had been deferred until October 1 next, he stated.

In explanation he said that the pattern of payments which had emerged from his Department's negotiations with the pharmacists and doctors had given rise to administrative complexities that forced him to conclude that it would be hazardous to assume it would be possible to operate the scheme in a fully efficient manner if it were to commence on a national basis on the one day. Accordingly, he proposed to abolish the dispensary system for the Eastern Health area on April 1 and the new service would be brought in on October 1 next for the rest of the country.

Explaining that the new scheme would provide family doctor services for those who up to now could not afford to pay for them, he said it was an important landmark in the development of the social services and would do away with a dispensary system which had originated in harsher days.

"We are, happily, living in times when we can remove the last vestiges of these days from our social legislation," said the Minister.

Continuing, the Minister said that the absence of dispensary centres in the next 12 months meant that the Department would be entering into a new arrangement with the pharmacists in the Health Services.

Pharmacists' income increased

"We have been in lengthy negotiation with you on the terms under which you will supply medicines to the medical card group — 30 per cent of the population — which will bring you a very large, increased income spread among all of you in different amounts — but nevertheless it will be an increased income for you."

The Minister went on: "I have just made a final offer to you. I think the letter was written on October 8. I do ask you, ladies and gentlemen, to consider my offer seriously. I made the best effort to meet your requirements. I believe my offer is fair, comparative with the position of pharmacists in Northern Ireland and allowing for the fact that they deal with the entire population, whereas you are only dealing with 30 per cent."

Final offer to pharmacists is fair—Minister

The Minister said he hoped that all pharmacists, in considering the offer, would bear in mind that he had to balance the taxpayers' interests with the rightful interests which pharmacists had in securing a fair reward for their services. He reminded them that Ireland was no different from any other country in Europe. The Health Services had become the biggest total burden of the Minister for Finance; the burden might not relate solely to the increase in the price of drugs but to the cost of servicing. Every year, four per cent more people were going into Irish hospitals, and in Great Britain, where the figures were about the same, one out of every eleven people spent some time in hospital last year — excluding mental hospitals.

That gave some idea of the enormous costs of the Health Services, which this year amounted to about £20 per head of the population, or to £70 to £80 per family, supplied out of taxes and rates, as equitably as possible between poor and rich. Of the £60 millions for the Health Services, the hospital services absorbed almost £40 millions, which was no different from the escalating Health Service costs in Britain and America.

Repeating his call to the pharmacists to be fair in their attitude to the negotiations, the Minister said: "I know you have got your point of view, but we have got to deal with inflation." Having appealed to the gathering not to judge the offer purely on the profit element the Minister said he was glad the negotiations had been conducted in the most amicable spirit.

"I am told you have no complaint about the officers of my Department and that you regard them as people you can negotiate with intelligently and amicably."

Concluding, Mr Childers said: "What I am asking you to do is to consider this matter carefully when it comes before you and to remember that, if the number of prescriptions have been below what we have calculated for the whole of the pharmacists, there will be a review of the profit element, and that it will be reviewed in any event in two years, on the basis of the profit allowed to pharmacists. I think that is a reasonable allowance."

The Minister explained that the scheme would be operated by computers which would deal with prescriptions and each visit paid by a patient to a doctor, would distinguish between domiciliary visits and surgery visits so that it would take until October next to operate the scheme for the entire country.

Earlier, the Minister said he hoped the pharmacists would act on the new Regional Health Boards in two capacities — in the professional capacity bringing their knowledge of drugs and drug usage — and from their experience of people coming into chemists' shops, and that they would also act as county councillors should, giving their opinion of what they consider is right in every decision made.

"Knowing your Association, I feel sure the members you will appoint will be able to act in this dual capacity of experts and Council members on these Boards."

He added: "I am very glad your profession is having a voice in this new and most unique system."

Dealing with dangerous drugs, the Minister urged pharmacists to bring immediately to the attention of his Department any irregularities that might be brought to their notice in relation to the amphetamines now swept from the shelves of community pharmacies, and also in relation to marijuana and heroin. "Please give us the information as soon as possible, because we are in the dangerous drugs business in this country. Dangerous drugs are now being used in Dublin and there is no Minister for Health who can stop addiction to dangerous drugs. He can only limit it to the greatest extent possible and I will thank you for your co-operation in this regard."

Profession's help promised

Mr Eric Burrell, president, Irish Pharmaceutical Association, who presided at the banquet (attended by the president of the various sister professions and the deputy mayor of Sligo, Alderman Seamus McManus), said that any assistance which pharmacists could give the Minister to minimise the incidence of drug abuse and addiction would be gladly placed at his disposal. He expressed special gratification at the close co-operation existing between pharmacists and the veterinary profession. Pharmacists in the '70s would play the part in providing a Health Service second to none.

The toast of "The Guests" was proposed by Mr Tom Guckian who said that pharmacy was fortunate in having Mr Childers in charge of Health at this crucial stage.

Replying, Mr Sean McHale, president, Pharmaceutical and Allied Industries Association Ltd, said he was pleased that the Minister realised the very important role which the pharmacist played in communicating the benefits of such potent drugs to the various professions. For him the motion in Mr. Burrell's name, passed at the annual meeting, heralded a new era in pharmacy. In a tribute to Mr Guckian and the local organisers of the Congress he said that the hard work which they had put into the venture was evident throughout the week.

Massive vote in favour of unification

The Pharmaceutical Society of Ireland has been given a clear mandate to take whatever steps are necessary for the creation of a representative body to advance the interests of pharmacists as recommended by the Joint Working Party on Pharmaceutical Reorganisation.

At the annual meeting of the Society in Sligo on October 12 a motion along those lines, in the name of Mr T. Miller, was carried by an overwhelming majority, only two members voting against. Mr Miller made it clear that he put the motion forward in a private capacity and not as president of the society.

For years, he said, pharmacists had had a number of organisations looking after their interests. They had done a very good job and deserved the thanks of all members. However, times were changing and pharmacy, of all professions, was being most affected.

It had been agreed said Mr Miller, that steps should be taken "as a matter of urgency" to appoint a committee to draft a constitution and that the executive committee should be composed of a majority of elected members together with nominees of the various groups in pharmacy and from the regions. It had also been agreed that the present Irish Drug Association structure be retained to cater for the particular needs of community pharmacists and that groups requiring separate services should be asked to pay a fee.

It was essential that trade union status should be provided for in this matter, added Mr Miller.

Health talks must end soon, IDA feel

When a progress report on various health matters was considered by the October 9 meeting of the Irish Drug Association Executive, in Dublin, it was suggested that the Department of Health be advised that further delays would render out-of-date any matters so far agreed with the Joint Negotiating Committee in relation to the new Health Services scheme. It was considered imperative that these negotiations should be concluded at an early date as undue delay would render them valueless.

Various veterinary matters, including distribution, prices and, possibly, proposed new legislation in relation to them, came in for lengthy consideration and it was agreed to seek a meeting with the veterinary division of the Pharmaceutical and Allied Industries' Association and also to call a further meeting, at a provincial venue, of the veterinary sub-committee comprised of members of the Pharmaceutical Society and of the IDA.

A suggestion from the Southern-

Regional Pharmacists' Association that the IDA was the most suitable body to reorganise local Associations in order to conform with the needs of the eight new Regional Health Boards was considered at length. It was envisaged that the IDA would co-ordinate the activities of these regions and it was agreed to call a meeting shortly to examine the matter in greater detail. The possibility of the pharmaceutical representatives on the various Regional Health Boards working in close liaison with the IDA Committee was also discussed and the suggestion met with the Committee's approval.

More control over animal medicines?

Tighter controls on the manufacture and importation of a wide range of veterinary products were forecast by Mr M. Hynes, director of veterinary services, Department of Agriculture and Fisheries, when he spoke at a recent luncheon of the Pharmaceutical and Allied Industries Association in Dublin.

There would, he said, have to be a reasonable period of adjustment between the enactment of the legislation and its detailed implementation by means of Ministerial statutory orders.

In this adjustment period there would probably be a gradual introduction of controls affecting various products, or different aspects of the production processes. It was during this period that he would see a place for a safety precautions scheme that would enable those in the trade to adjust themselves to voluntary control practices and thus prepare themselves painlessly for the day when they will be statutorily required to toe the line.

The changes were going to create problems for consumers, manufacturers and distributors, said Mr Hynes. "We must recognise also that to some extent there will be a conflict of interests in regard to this development. There will be many areas of your business that will not be affected by whatever controls are eventually introduced. For those areas that are affected your profession will be assuming new responsibilities and so will the veterinary profession — but I have no doubt that the integrity and sense of professional ethics which have characterised your business in the past will make it possible in the future to live with the new situation."

The publication of the Swann Report in Britain had introduced a note of urgency to the situation and the acceptance of the Swann Committee findings by the British Government had serious implications for the Republic in relation to its export trade. "In evolving controls we must have regard, not only to conditions at home from the points of view of both human and animal health, but also to the requirements of our export customers, particularly Britain," asserted Mr Hynes.

A special co-ordinating committee recently set up by the Department had

made recommendations about the control of the incorporation of antibiotics and certain other substances in compound feeding stuffs and it was the intention that these would be included in statutory regulations to be made under the Fertiliser, Feeding Stuff and Mineral Mixtures' Act.

There was one factor which might, in the short term, make it necessary for the Minister for Agriculture to take unilateral action to impose controls on veterinary drugs without reference to proposals for control on the human side, and this was the possibility that the imposition of standards by the British in relation to the incidence of resistant organisms in imported products might make it imperative for the Republic to impose, at short notice, controls on the availability to stock owners of those drugs, mainly antibiotics, which gave rise to resistant organisms.

If such action proved necessary he would visualise the imposition of controls of a temporary nature under the Animal Remedies' Act, to be followed, in due course, by more comprehensive controls under the Poisons legislation applying to the whole field of the sale of drugs for medical and veterinary purposes.

Presentation to Owen Waller

During the banquet held at the Sligo congress Mr D. J. Kennelly presented Mr Owen Waller, former Editor of the *C&D* with a set of Waterford cut glass to mark the appreciation of Irish pharmacists of his work as Editor of the journal for almost 20 years. He said "this very distinguished pharmacist" had always proved a great friend of Irish pharmacy. In their efforts to raise their standards, Irish pharmacists had turned to Mr Waller who had never failed to place his great experience at their disposal. Mr Waller was a true friend of Irish pharmacy and had always shown a great interest in things Irish.

Replying, Mr Waller said that he had "jumped with alacrity" at every occasion that had presented itself for him to visit Ireland while he was Editor of the publication.

Sligo golfers

There was a great turn-out for the golf competition in Sligo when the winners were: John Fitzgibbon, Dublin (4), 38; John Hanley, Limerick (8), 34; Eric Koss, Sligo (8), 33; Chris Higgins, Sligo (11), 31 (on second nine); L. E. Horan, Sligo (18), 31 (on second nine); J. Staunton, Castlebar (11), (on second nine); G. Golden, Westport (7), 31; Harry Horan, Ballymote (14), 31. A talking point was the feat of Eric Koss who had an albatross at the par five 12th hole.

Ladies: Ten-hole Stableford: Miss Anna Dorrian, Bundoran (15 points); Miss Evelyn O'Byrne, Galway (14); Mrs Rena Dalton, Banagher (13, on second nine); Mrs C. Horan, Ballymote (13); Miss Teresa Landers, Galway (10 on second nine); Mrs Betty Higgins, Sligo (10).

Pharmacists' role as 'positive health' promoters

Pharmacists should become more involved in "positive health" or preventive medicine, said Mr George Teeling-Smith when he addressed the Wessex Region conference, in Winchester on October 18.

He said that pharmacists should "move in to fill an obvious gap in the health scene." There was a clinical "iceberg" of persons needing treatment. They include 300,000 diabetics, 1,200,000 hypotensives, 500,000 bronchitics, probably 10 million obese persons and around 50,000 pregnant bacteriureas a year.

The general practitioner could not usually charge for health checks and thus he had no motive to carry one out; in fact, it was impracticable for him to provide checks for all the individuals on his "panel." A pharmacist could charge for services that he provided. Pregnancy testing was now an accepted feature of the pharmaceutical scene, as, going further back, were weighing machines providing a diagnosis for obesity. There was no reason why pharmacists trained in bacteriology could not undertake urine testing and charge doctors and patients.

At a recent cardiology conference a machine costing £10 was exhibited which a patient could use to ascertain his blood pressure. Increased blood pressure was well correlated with early death and randomised trials had shown the benefits of screening patients.

It was recognised that there might well be a borderline problem, but a diastolic pressure of over 100 definitely required treatment. Mr Teeling-Smith saw no reason why pharmacists should not install the appropriate machines and offer to check patients' blood pressures for a reasonable fee.

He also went on to suggest that a logical development would be the offering of psychiatric tests with "Yes/No cards." Again a reasonable fee could be charged. Technically such health checks were within the scope of every pharmacist.

At present the patient made the first decision to undergo or seek treatment unaided. The risk of errors in interpreting the tests needed to be set against the risk of doing nothing. There was an overwhelming need to bring patients earlier for treatment and there was nothing immoral in charging for a service conspicuously excluded from the National Health Service. The public were willing to pay extra for such health services. The doctors, already complaining of overwork, could not object to their role being usurped. It would establish a valid role for the High Street pharmacy in the community.

Mr Teeling-Smith put forward these suggestions in view of the fact that the pharmacist's dispensing role was "rapidly becoming irrelevant." Dispensing was currently a largely automatic procedure and was likely to lend itself to increased automation and possibly computerisation. Pharmacy had the choice of adapting itself and, therefore, Mr Teeling-Smith

suggested that pharmacists should look towards the new fields of preventive medicine and the treatment of trivial illness. Whilst the problem of preventive medicine might well initially cause critical reaction from doctors they would probably approve of pharmacies treating minor disease for they were openly resentful of their time being wasted. In a 1967 survey 53 per cent of doctors mentioned "trivialities" as a patient abuse.

Pharmacy's 'vital' team function

It needed a team of personnel to bring about the "total care" of a patient, and a pharmacist was a vital member of that team. That statement was made by Dr R. G. Gibson, chairman, British Medical Association Council, during the afternoon session of the Wessex Region conference.

Dr Gibson, who practises in Winchester, said he could not "do without the pharmacists in Winchester." He explained that treatment with drugs was a decreasing part of "total care," which required social workers, home helps, midwives and pharmacists — "not necessarily in that order." The team must be a closely knit one. Where you put the pharmacist was not for him to say.

Later, when there was some suggestion that doctors were signing prescriptions and then passing them to a receptionist to complete, Dr Gibson said he could not condone such a practice — "It's like signing

a blank cheque." He suggested the remedy might be informal discussions through the NHS committees.

Mr J. R. Phillips, Bournemouth, pointed out that the group practice with its outer office was having a tremendous effect on the doctor-pharmacist relationship and he asked Dr Gibson and the members of the panel how the situation could be improved.

Dr W. R. L. Brown, chief pharmacist, St Bartholomew's Hospital, suggested the place to start changing the relationship was in hospital where the medical graduate first met a pharmacist.

Dr Gibson agreed the place to start was with the undergraduate. He said that in group practice training he had asked that the training doctor should spend some time with one or more chemists in the city.

He said he "believed terribly" in the social side of life and considered that members of the various professions should meet.

Later Dr Gibson said he was conscious of an awful sense of bitterness against doctors and he told his audience: "If that is so then you should have done something about it before now."

Mr J. C. Bloomfield, a member of Council, Pharmaceutical Society, did not believe such bitterness existed generally. There might be local problems Dr Gibson said. The nearer to bigger conurbations, the bigger were the troubles, but in his visits to local BMA organisations he had not heard complaints against pharmacists.

When a Bournemouth member suggested it might be advantageous if chemists were allowed to substitute when dispensing prescriptions, Mr Bloomfield emphasised the profession had repeatedly "set its face" against that practice.

Dr Brown referred to the fact that many hospital pharmacists had powers to substitute, but now there was a tendency for more investigation and for hospital pharmacists to be a little more critical of the material they were using.

Pharmacy licencing in France: the benefits and drawbacks

France operates a licensing system for pharmacies designed to ensure a network of distribution points for medicines, planned to be accessible to the public, together with a freeing of the pharmacist from the need for "commercial adventures" so that he can devote himself to professional work.

But, the system has its faults, M Georges Viala, *Sécrétaire Général de l'Ordre des Pharmaciens*, explained in the Franco-British Pharmaceutical commission lecture in London last week.

M Viala took as his subject, the French system of geographical distribution of pharmacies. The subject was a wide one which aroused great argument and discussion, and had been in operation for almost 30 years. Taking first the historical development, he explained how, before 1939, the general practice pharmacist was characterised by the possession of a State diploma, and a monopoly in the preparation and dispensing of medicines. A pharmacist could set up where he wished, and competition was keen. The Vichy government enacted legislation which controlled and improved pharmacy practice. The principles were a fixed prices system, a restriction on the activities of a phar-

macist outside his monopoly, and a limitation on the number of premises.

Henceforth premises would require a licence and in the case of new premises, this would only be granted if it came within a regional plan. The plan had two aims. These were the control of the number of pharmacies, in varying proportions according to area populations, and a system of indemnity payments for premises that were in excess of local requirements, and which would be altered when the owner ceased to practise. The indemnity was to be paid on an agreed basis, with the Minister as final adjudicator in cases of dispute.

However, the plans were not fully implemented and at the end of the war, when the Vichy government was dissolved, only one pharmacy had been closed. With the advent of new republican constitution, the system was replaced. Price regulation was maintained, but the concept of limitation of pharmacies was replaced by geographical distribution. The indemnity scheme was dropped. Henceforth new pharmacies could be established in accordance with ratios according to the population, and additionally, where the interest of public health showed it desirable.

M Viala then explained the present system of pharmacy licensing. A pharmacy may be owned by one person, a partnership, or a limited company, but in all cases, the effective ownership and control must be in the hands of pharmacists. There are also pharmacies owned by public or private health institutions, or belonging to mutual benefit societies, or miners' aid funds, but these are the subject of special consideration.

Licences for the opening of private pharmacies are issued by the Préfet. In cases where the establishment is claimed on the basis of published population figures the procedure is relatively simple. The applicant must show, among other things, his right to the occupation of the premises, and it is established that when multiple applications are made, the licence is granted to the first person who provides the completed documents, and where premises are available at the time.

Essentially the granting of the licence depends on Census figures, and after consultation with pharmaceutical organisations, and the regional social and health departments, the Préfet grants the licence. In areas of low population an application can succeed, if it can be shown that there is an influx of clients from neighbouring areas, which would raise the population and which would make his pharmacy the most probable supply centre for medicines. In addition, the Préfet may specify the minimum distance between the proposed pharmacy, and those already established.

M Viala explained that the population ratios were not the sole criteria, and where

Hospital pharmacy forum

by a hospital pharmacist

Now that the dust is settling around the British Pharmaceutical Conference in Leeds it is perhaps worthwhile to take another look at it.

The Conference is now under new management, a move which was mooted at least as long ago as 1928 and certainly it has been very much in the air since the middle of the last decade. The Pharmaceutical Society has contributed more and more of its funds to bring Branch delegates to the Conference, and it is, therefore, not unreasonable that they should welcome the more positive control now given to them.

In the end, what really matters is whether or not the Conference members are happy with the change. This will depend on whether the science papers continue at their present high level, the professional sessions continue to be a useful platform for airing current topics, and whether the innovations, such as the Conference lecture (1961) or the history of pharmacy sessions (1967), are added to by industrial, general practice and hospital symposia.

Leeds paved the way to the introduction of a hospital session in future conferences. The first professional session on "Present and potential developments in

the practice of pharmacy in hospitals and their possible effect on general practice pharmacy," was the type of symposium which could greatly benefit the hospital pharmaceutical service.

Dr W. R. L. Brown's paper was a major summary of the present position, the purpose of the Sir Noel Hall report and the future of hospital pharmacy and its influence on the future of general practice, not only in pharmacy but in medicine as well. Professor Tunbridge gave his own view of the hospital situation looking at it as a well-informed observer. It was inevitable that the two viewpoints would clash. The stage was thus set for a brilliant discussion.

Alas, this was not to be. Of the Guild Council members present, only one spoke.

To the many hospital pharmacists who were anxiously awaiting the report of this discussion it must appear that this was a missed opportunity and they must be grateful that hospital pharmacy has good friends who can drive home the points that were there to be made.

Another aspect of the Conference which has caused misgivings in the hospital ranks is the omission from the new science committee of a hospital pharmacist. It has been argued that the science commit-

tee must be comprised of the scientific disciplines of pharmacy.

No one will dissent from that, nor for that matter will there be much disagreement about the membership of the committee. But, where, outside the narrow walls of academy is the applied science of pharmacy to be practised, if it is not in the hospitals, and who is to say, Noel Hall willing, that a great deal more science will not be needed there? The British Pharmaceutical Conference has for many years included hospital pharmacists among its executives, culminating with Dr W. R. L. Brown. The science committee showed a lack of wisdom in not appointing a hospital pharmacist to their ranks. Let us hope that the Guild and the Pharmaceutical Society's hospital sub-committee will make strong representations to have the matter righted.

We understand that there will no longer be a chairman's address as such, at future Conferences. This opportunity to honour a person outstanding in the field of pharmacy will be sadly missed if it is allowed to vanish altogether. Pharmacy needs an outstanding lecture every year. Let us institute a Jacob Bell Lecture and let it be given by the outstanding pharmaceutical scientist of the year.

COMING EVENTS

Teleton helps you keep an eye on things — like costs

Teleton's closed circuit T.V. systems can be installed in supermarkets, stores, hotels, restaurants, clubs... in fact anywhere where constant surveillance is necessary.

Just one MC 920 camera, standard lens, and the 9PM2S 9" monitor, wall bracket and 30' of cable—installed quickly and without fuss—gives you immediate coverage... and for only £147.10. Undoubtedly one of the finest and cheapest package deal systems on the market. An alternative package deal, substituting a tripod for the wall bracket, is available for £159.10. Installation in the London area can be handled at cost.

The Teleton range also includes other cameras, a wide selection of lenses, monitors and consoles, pan and tilt tables, wall brackets, tripods, weather and waterproof housings and other accessories.

Descriptive literature is available on request, or our technical representative will visit your organisation to plan an installation and prepare a quotation.

Teleton Electro (UK) Co. Ltd
